RequiredFields

```
graph LR; A["App\Controllers\Api<br>\ApiPostController\createFungi"] --> D["App\Controllers\Api<br>\ApiPostController\validate<br>RequiredFields"]; B["App\Controllers\Api<br>\ApiPostController\handleLogin"] --> D; C["App\Controllers\Api<br>\ApiPostController\registerUser"] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three separate API controller methods (createFungi, handleLogin, and registerUser) are shown on the left, each in its own box. Blue arrows point from each of these three boxes to a single, larger, shaded box on the right. This shaded box represents a common validation method (validateRequiredFields) that all three controller methods likely utilize.
