

App\Controllers\SessionController
\getUserData

App\Controllers\SessionController
\isAdmin

App\Controllers\SessionController
\isLoggedIn

```
graph LR; A["App\Controllers\SessionController<br>\getUserData"] --> C["App\Controllers\SessionController<br>\isLoggedIn"]; B["App\Controllers\SessionController<br>\isAdmin"] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes represent source methods: 'App\Controllers\SessionController \getUserData' (top) and 'App\Controllers\SessionController \isAdmin' (bottom). On the right, a gray rectangular box represents the target method: 'App\Controllers\SessionController \isLoggedIn'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source methods interact with or depend on the target method.
