

App\Controllers\Api  
\ApiAuthController\generate  
JwtToken

App\Controllers\Api  
\ApiAuthController\verifyJwt  
Token

App\Controllers\Api  
\ApiAuthController\base64URLEncode

```
graph LR; A["App\Controllers\Api<br>\ApiAuthController\generate<br>JwtToken"] --> C["App\Controllers\Api<br>\ApiAuthController\base64URLEncode"]; B["App\Controllers\Api<br>\ApiAuthController\verifyJwt<br>Token"] --> C;
```

The diagram illustrates a dependency or relationship between three API controller methods. On the left, there are two white rectangular boxes. The top box contains the text 'App\Controllers\Api' followed by '\ApiAuthController\generate' on the next line and 'JwtToken' on the third line. The bottom box contains 'App\Controllers\Api' followed by '\ApiAuthController\verifyJwt' on the next line and 'Token' on the third line. On the right, there is a gray rectangular box containing the text 'App\Controllers\Api' followed by '\ApiAuthController\base64URLEncode' on the next line. Two blue arrows point from the right side of the top white box and the right side of the bottom white box to the left side of the gray box, indicating that both 'generateJwtToken' and 'verifyJwtToken' depend on or use 'base64URLEncode'.
